COPYWRITER PRO TOWER DUPLICATORS

MICROBOARDS® Technology

COPYWRITER PRO CD/DVD TOWER DUPLICATORS

Don't let the production of high-quality CDs or DVDs in large volumes become an annoyingly tedious chore. Whether it's one disc at a time, or hundreds per run, turn to the longtime industry standard for performance and reliability—the Microboards CopyWriter CD/DVD tower duplicator. Insert your master in the top drive, place blank discs in the remaining drives, and let it burn!

Get your jobs done fast. All CopyWriter systems feature 48X CD-R / 24X DVD-R/+R recorders. The intuitive premium 8-button panel and multi-line display make copying discs a simple procedure for the novice user, while keeping all the high-end, power-user features in tact, like disc verification mode and adjustable recording speeds, for the advanced power user. Now, towers also include an optional 500 GB dynamic hard drive for storage of disc images, making it easy to drag and drop files to burn from your PC using a USB 2.0 cable.

NEW FEATURES: Access your tower copier from anywhere on your network with an optional networkability upgrade! Also, copy-protect your DVD Videos with CopyLock software from Microboards. See web for details.
