# SAFARI

The **SAFARI** tripod system is a fluid action head with carbon fibre tripod, designed to be a compact lightweight travel companion for your Mini-DV camera, wherever your destination is.

The fluid action head has variable settings for pan and tilt drag that provides smooth operational movements and is perfect for Mini-DV Camera payloads up to 5kg. The **SAFARI** fluid action head also has 55mm ball levelling so you can always achieve a level horizon when panning.

The carbon fibre telescoping legs, have three adjustable leg angle settings and a bubble level, so you can set up your tripod legs, evenly on any surface. The Safari tripod has very versatile height settings from as low as 0.2m to 1.4m high.

Included in the **SAFARI** Tripod system is a soft carry case to protect your tripod system during transport and also allows room for additional accessories. The **SAFARI** tripod system packs down to a very compact 0.6m and weighs a mere 3.6kg making it perfect for when you want to travel light!

## SPECIFICATIONS
