AJA Pak Dock

Overview

This brief guide describes the AJA Pak Dock. The AJA Pak Dock is a media reader for use with AJA Pak solid state media. AJA Pak media is used with the AJA Ki Pro Quad tapeless video recorder. The Pak Dock may be connected to a host computer by either a Thunderbolt or USB 3.0 cable connection. Both connection types provide high speed data transfer capabilities.

Figure 1. Pak Dock (left) and Pak (right)

Features

The AJA Pak Dock features a single slot for the insertion of AJA Pak media. The dock features Thunderbolt and USB 3.0 connectors as well as a rugged, industrial-strength case making it suitable for studio or field use.

What's In The Box?

When you unpack your product you'll find the following components:

- AJA Pak Dock unit
- AC power supply

Please save all packaging in case you need to ship the product in the future.

NOTE: *A cable for connecting the Pak Dock to the host computer is not included and must be supplied by the user. You may use either a Thunderbolt or USB 3.0 cable (A Male to Micro B Male).*

Installation

Pak Dock installation couldn't be simpler:

1. Unpack and place the Pak Dock on a flat, stable surface near your host computer.
2. Ensure the computer is off.
3. Connect the Pak Dock to your host computer using either a Thunderbolt or USB 3.0 cable. Do not plug both types of cables into the Pak Dock and the host computer at the same time; only one data connection between the Pak Dock and the computer is supported.
4. Connect the AJA-supplied power supply to the Pak Dock and plug it into a 100-240 VAC power outlet.
5. Turn on your computer.

Using Thunderbolt with Windows OS Computers

Special Considerations: The Pak Dock is essentially a “plug and play” device when the Thunderbolt connection is used with computers running Mac OS X. When the Pak Dock is connected to Windows OS computers via the Thunderbolt connection, there are special considerations to be aware of.

With current Windows OS versions, you may need to install a driver so that the SATA connection in the Pak Dock operates as expected in Windows. This driver can be located on the AJA website in the support area for Ki Pro Quad and Ki Pro Rack under the Software section. Be sure to click on the Windows icon in the Software section to show the available Windows drivers.

<http://www.aja.com/en/products/ki-pro/#support>

If you wish to remove Pak media from the Pak Dock when connected to a Windows OS computer, use the appropriate method to first gracefully eject the current Pak media from use by Windows OS.

Operation

The following instructions explain Pak Dock operation.

Inserting Media

To properly insert media into the Pak Dock, orient the media so that the side with the AJA logo is facing you and the logo is inverted. Then place the connector end of the media into the Pak Dock slot. Push the Pak media all the way into the slot gently, but firmly, until you feel the connector seat solidly.

Once the Pak media is inserted into the Pak Dock, your operating system should mount the Pak media the same as any other external volume or disk drive. Depending upon your operating system version, you may see a disk icon appear on the desktop or within the operating system file manager.

NOTE: *AJA Pak media is HFS+ formatted. If the Pak media is used on Windows OS computers, a third-party HFS+ support application, such as Mediafour's MacDrive, is required.*

After the Pak media is mounted by your host computer's operating system, you can copy files from and to the Pak media. You may also delete files from the Pak media. You may copy virtually any file to the media outside of the “AJA” folder.

To add files to the Pak media for playback on the Ki Pro Quad, you must properly encode the files as QuickTimes and place them in the “AJA” folder on the Pak media. Valid media files for Ki Pro Quad have the following specifications:

Full-raster Frame Rates: QuickTime files that are full-raster and use the specified frame rates:

- 4096x2160 (4K) 23.98/24/25/29.97fps
- 3840x2160 (Quad HD) 23.98/24/25/29.97fps
- 2048x1080 (2K) 23.98/24/25/29.97/50/59.94fps
- 1920x1080 (HD) 23.98/24/25/29.97/50/59.94fps
- 1280x720 (HD) 50/59.94fps

Encoding: QuickTime files that are encoded as follows:

- Apple ProRes 444
- Apple ProRes 422 (HQ)
- Apple ProRes 422
- Apple ProRes 422 (LT)
- Apple ProRes 422 (Proxy)

QuickTime Audio: QuickTime files that are encoded with the following audio properties:

- 24-bit, 48kHz audio (2 or 8 channel), if audio is included.

NOTE: Files copied to AJA Pak media that do not meet these criteria may not appear on the Ki Pro Quad or may not play back as expected.

Unmounting Procedure

To remove Pak media from your operating system, use the methods typically used for gracefully un-mounting/ejecting any type of removable media.

Caution!

Do not physically remove media from the Pak Dock without first gracefully un-mounting/ejecting it from the operating system. Failure to properly un-mount/eject media may lead to data corruption, directory fragmentation, and error messages from your operating system.

Disconnecting the Pak Dock

When disconnecting the Pak Dock, be sure to first un-mount/eject the media using the proper procedure as noted earlier for your operating system. Then power off your computer and disconnect the Pak Dock power and data (Thunderbolt or USB 3.0) connections.

Appendix A: Compliance

Federal Communications Commission (FCC) Compliance Notices

Class B Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15, Subpart B of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Canadian ICES Statement

Canadian Department of Communications Radio Interference Regulations

This digital apparatus does not exceed the Class B limits for radio-noise emissions from a digital apparatus as set out in the Radio Interference Regulations of the Canadian Department of Communications. This Class B digital apparatus complies with Canadian ICES-003.

Règlement sur le brouillage radioélectrique du Quadstère des Communications

Cet appareil numérique respecte les limites de bruits radioélectriques visant les appareils numériques de classe B prescrites dans le Règlement sur le brouillage radioélectrique du ministère des Communications du Canada. Cet appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada.

European Union and European Free Trade Association (EFTA) Regulatory Compliance

This equipment may be operated in the countries that comprise the member countries of the European Union and the European Free Trade Association. These countries, listed in the following paragraph, are referred to as The European Community throughout this document:

AUSTRIA, BELGIUM, BULGARIA, CYPRUS, CZECH REPUBLIC, DENMARK, ESTONIA, FINLAND, FRANCE, GERMANY, GREECE, HUNGARY, IRELAND, ITALY, LATVIA, LITHUANIA, LUXEMBOURG, MALTA, NETHERLANDS, POLAND, PORTUGAL, ROMANIA, SLOVAKIA, SLOVENIA, SPAIN, SWEDEN, UNITED KINGDOM, ICELAND, LICHTEINSTEIN, NORWAY, SWITZERLAND

Declaration of Conformity

Marking by this symbol indicates compliance with the Essential Requirements of the EMC Directive of the European Union 2004/108/EC.

This equipment meets the following conformance standards:

Safety:

CB- IEC 60065: 2001 + A1: 2005 + A2

NRTL - UL 60065: 2003 R11.06, CSA C22.2 NO. 60065: 2003 + A1:06

GS - EN 60065: 2002 + A1 + A2 + A11: 2005 + A12

Additional licenses issued for specific countries available on request.

Emissions:

EN 55103-1: 2009, CISPR22: 2008

EN61000-3-2: 2006 + A1: 2009 + A2: 2009, EN61000-3-3: 2008

Immunity:

EN 55103-2: 2009

EN61000-4-2: 2009, EN61000-4-3: 2006 + A1: 2008,

EN 61000-4-4: 2004 + A1: 2010, EN 61000-4-5: 2005, EN 61000-4-6: 2007, EN61000-4-11: 2004

The product is also licensed for additional country specific standards as required for the International Marketplace.

Warning!

This is a Class B product. In a domestic environment, this product may cause radio interference, in which case, the user may be required to take appropriate measures.

Achtung! Dieses ist ein Gerät der Funkstörgrenzwertklasse B. In Wohnbereichen können bei Betrieb dieses Gerätes Rundfunkstörungen auftreten, in welchen Fällen der Benutzer für entsprechende Gegenmaßnahmen verantwortlich ist.

Attention! Ceci est un produit de Classe B. Dans un environnement domestique, ce produit risque de créer des interférences radioélectriques, il appartiendra alors à l'utilisateur de prendre les mesures spécifiques appropriées.

Korea KCC Compliance Statement

1) Class A ITE

A 급 기기 (업무용 방송통신기자재)	이 기기는 업무용 (A 급) 전자파적 합기기로서 판매자 또는 사용자는 이 점을 주의하시기 바라며 , 가정 외의 지역에서 사용하는 것을 목적으로 합니다 .
---------------------------	--

1) Class A device

Class A (Broadcasting Communication Equipment for Office Use)	As an electromagnetic wave equipment for office use (Class A), this equipment is intended to use in other than home area. Sellers or users need to take note of this.
