K712PRO

REFERENCE STUDIO HEADPHONES

HIGHLIGHTS

- » **3 dB improved low end performance for more powerful sound imaging**
- » **Engineered in Austria, hand-crafted in Europe with highest attention to detail**
- » **Pre-selected transducers for performance consistency and accurate localization**

FOR PRECISION LISTENING, MIXING AND MASTERING

The K712 PROs are reference, open, over-ear headphones for precise listening, mixing and mastering. The over-ear design guarantees maximum wearing comfort for fatigue-free mixing and mastering, while providing spacious and airy sound without any compromise. Their precise powerful sound results from improved low-end performance by 3dB. Being engineered in Austria, the K712 PROs represent the high quality and legendary design AKG is known for.

These headphones have a genuine soft leather headband for a lightweight and comfortable fit. Their carefully selected transducers provide consistency and accurate localization. The K712 PROs come with a professional mini XLR connector for quick replacement of the cable. Also included are an additional coiled cable and a premium carrying bag.
