FCC INFORMATION

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital service, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Any changes or modifications made to this equipment may void the user's authority to operate this equipment. This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ◆ Reorient or relocate the receiving antenna.
- ◆ Increase the separation between the equipment and receiver.
- ◆ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ◆ Consult the dealer or an experienced radio/TV technician for help.

FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

RoHS

This product is RoHS compliant.

SJ/T 11364-2006

PACKAGE CONTENTS

The VS881 package contains the following items:

- ◆ 1 VS881 8-Port Video Switch
- ◆ 1 Infrared Remote Control Handset
- ◆ 1 Infrared Receiver (with 1.8m attached cable)
- ◆ 1 Video Cable (1.2m)
- ◆ 1 Power Adapter
- ◆ 1 User Instructions*

Check to make sure that all the components are present and that nothing got damaged in shipping. If you encounter a problem, contact your dealer.

Read this manual thoroughly and follow the installation and operation procedures carefully to prevent any damage to the unit, and/or any of the devices connected to it.

* Features may have been added to the VS881 since this manual was published. Please visit our website to download the most up-to-date version of the manual.

OVERVIEW

The VS881 Video Switch is a modern control unit that allows you to conveniently display the video output of eight separate computer systems on a single monitor, or via a multimedia projector - thereby eliminating the

unnecessary expense of purchasing a separate monitor for each computer. The VS881 is perfect for corporate presentations, company briefings and institutional learning centers.

The VS881 improves on previous video switch models with enhanced features that include a freely accessible concentric-hub design; easy computer selection via push buttons; intelligent infrared (IR) remote control; and electronic switching technology, rather than mechanical switching, for reliability and durability.

The VS881 also saves on the space that additional monitors take up, as well as the extra power costs, and eliminates the inconvenience and wasted effort involved in constantly moving around from one computer to another.

FEATURES

- ◆ Displays the video output of eight separate computers on a single monitor or projector
- ◆ Modern concentric design with logical connector layout for quick and easy access
- ◆ Fast and convenient computer selection via push buttons or infrared (IR) remote control
- ◆ External IR Receiver (1.8m) for maximum efficiency and convenience
- ◆ Extra-thin IR handset allows easy storage in the mother unit
- ◆ Electronic switching for greater reliability and durability
- ◆ Superior video quality - up to 2048x1536; DDC; DDC2; DDC2B
- ◆ Supports VGA, SVGA, XGA, UXGA, QXGA and multisync monitors
- ◆ Easy installation - no software required - no configuration necessary
- ◆ Automatic incoming signal selection (Auto)

CONSOLES

- ◆ A VGA, SVGA, XGA, or Multisync compatible analog monitor, with a 15-pin HDB type male connector

COMPUTERS

- ◆ A VGA, SVGA, XGA, or Multisync analog video source with a standard PC 15-pin HDB type female connector

CABLES

- ◆ Video cable with one male and one female HDB-15 connector at each end for each computer you will be installing

Note: One (1) video cable is supplied with this unit.

COMPONENTS

TOP VIEW

No.	Component	Description
1	Port LEDs	<ul style="list-style-type: none">◆ A LED lights ORANGE to indicate the computer connected to its corresponding port is Online.◆ The LED changes to GREEN to indicate the computer connected to its corresponding port is the one that is currently selected.◆ The LED goes out when the computer connected to its corresponding port is in Standby mode.
2	Port Down Switch	Press this button to switch the video focus to the computer previous to the current one.
3	VGA Display On/Off	Powers the unit's VGA display ON and OFF.
4	Port Up Switch	Press this button to switch the video focus to the computer subsequent to the current one.

FRONT VIEW

No.	Component	Description
1	IR Reciever Portt	The external IR Receiver has an attached cable that allows it to be placed anywhere up to 1.8m from the switch, The cable from the external IR Receiver plugs in here.
2	Monitor Port	The cable from the monitor or digital projector plugs in here.
3	Power Jack	The AC Power Adapter cable plugs in here.

REAR VIEW

No.	Component	Description
1	Video Ports	The cables that connect to the computer video ports plug in here. There are eight video ports distributed around the VS881's circumference.

IR REMOTE CONTROL

No.	Component	Description
1	VGA Display ON / OFF	Powers the unit's VGA display ON and OFF.
2	Port Up / Port Down	These buttons function in a similar manner to the Port Up / Port Down buttons on the main unit. Press these buttons to switch the video focus to the NEXT or PREVIOUS computer on the installation.
3	Port Selection	The numbers correspond to the video ports on the main unit. Press a button (1 to 8) to switch the video focus to the computer connected to its corresponding port. Note: The VS881's remote control handset comes packaged in protective plastic film. Please remove this film before operating it with the VS881 main unit.

INSTALLATION

1. Make sure that the power to any device that you connect to the installation has been turned off. You must unplug the power cords of any computers that have the *Keyboard Power On* function.
2. Make sure that all devices you will be installing are properly grounded.
3. Do not look directly at the light coming from the fiber optic connectors and cable as it is harmful to the eyes.

Refer to the installation diagram on the next page (the numbers in the diagram correspond to the numbers of the steps) and do the following:

1. Make sure that power to all the devices you will be connecting up have been turned off.
2. Plug the monitor or digital projector cable into the unit's Monitor port.
3. Plug one end of a video cable (see *Cables*, page 7), into any available video port on the unit; plug the other end into the computer's video output port.
4. Plug the power adapter (supplied with this package) into an AC source; plug the power adapter cable into the unit's Power Jack.
5. Plug the IR Receiver cable into the IR Receiver port at the front of the main unit.
6. Power On all equipment.

PORT SELECTION

Manual Port Up / Port Down

Use the Port Up and Port Down buttons, located on the top of the VS881 unit, to cycle the video focus to the port you want.

A Port LED changes from ORANGE to GREEN to indicate that the computer connected to its corresponding port has the video focus.

IR Port Up / Port Down

The video focus can also be cycled among the computers using the Port Up and Port Down buttons of the IR Remote Control Unit (refer to page 10).

Note: The IR Remote Control Unit is used in conjunction with the external IR Receiver (see the diagram on page 12).

IR Direct Port Selection

Instead of cycling among the individual computers one-by-one, a computer can be directly selected by pushing the button on the Remote Control Unit that corresponds to its port number (1-8) on the main unit.

The selected port's LED changes from ORANGE to GREEN to indicate that the computer connected to its corresponding port has the video focus.

Note: For optimum performance make sure that there is a clear line-of-site between the handset and the receiver.

AUTOMATIC INCOMING SIGNAL SELECTION

The VS881 supports Automatic Incoming Signal Selection, which automatically selects the proper input signal for its output port. The VS881 automatically switches to the port that has signal input.

If all ports of the VS881 do not have any signal input, the VS881 waits until at least one of the ports gets a signal input and automatically switches to that port. If two ports get signal inputs, the VS881 switches to the first port it detects.

SPECIFICATIONS

Function		Specification
Computer Connections		8
Port Selection		Pushbutton, IR Remote Control
Connectors	Video In	8 x HDB-15 Male (Blue)
	Video Out	1 x HDB-15 Female (Blue)
	Power In	1 x DC Jack
	IR	1 x Mini Stereo Jack Female (Black)
Switches	Port (Up)	1 x Pushbutton
	Port (Down)	1 x Pushbutton
	VGA Display On/Off	1 x Pushbutton
LEDs	On Line/Selected	8 (Orange / Green)
	VGA Display On/Off	1 (Blue)
Video Resolution		2048 x 1536 @ 60Hz
Power Consumption		DC5V, 4.5W
Environment	Operating Temp.	0–50°C
	Storage Temp.	-20–60°C
	Humidity	0–80% RH, Non-condensing
Physical Properties	Housing	Plastic
	Weight	0.45 kg
	Dimensions (L x W x H)	17.00 x 19.00 x 4.50 cm
