## Portable 3-Channel Microphone Mixer

### OPERATING MANUAL

Thank you for purchasing the Azden CAM-3 Portable Microphone Mixer. It is a highly versatile, compact mixer. It does not require a power source and is ideal for field use.

**NOTE:** The CAM-3 is designed to work with microphones only. Other audio devices, like MP3 or CD players will not work with the CAM-3.

① **Volume Sliders**

Set the 3 volume sliders to the “MAX” position and adjust them as necessary to make up for differences in microphone types and volume levels. Do not be concerned if the 3 volume sliders are in widely different positions.

② **CH1 & CH2 MIC Input Jacks (Monaural)**

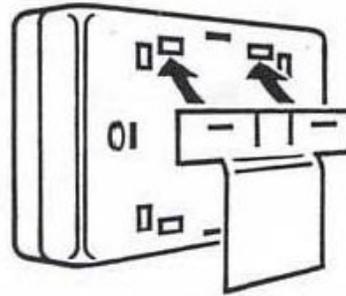

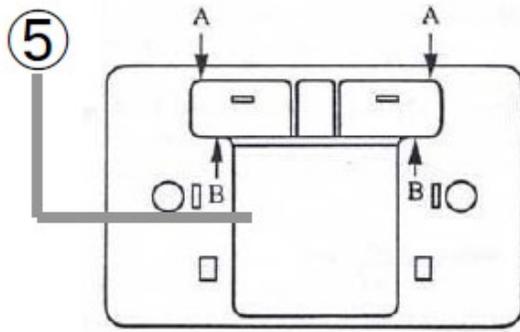

Plug microphones into CH 1 and/or CH 2 jack. Audio into CH 1 will output into the Right channel and CH 2 to the Left channel.

③ **CH3 Stereo MIC Input Jack**

Connect a stereo microphone here. Audio will be equally output between the Right and Left channels.

④ **Output Jack (Stereo)**

Using the supplied cable, connect the CAM-3 to the microphone input of a video camera or other recording device.

### ⑤ Belt Clip

To remove: Press down gently and push the tabs in direction “A”.

To attach: Press down gently and push the tabs in direction “B”.

The belt clip may be mounted in 4 different positions.

## ADJUSTMENT

Monitor the sound by plugging a headphone or earphone (not included) into the headphone output jack on the video camera. After mounting the CAM-3 and making all the connections, set the 3 volume sliders to the “MAX” position. Adjust the volume sliders as necessary, to make up for differences in microphone types and sound levels. Do not be concerned if the 3 volume sliders are in widely different positions.
