

The QR-A200 Gold Mount® is designed specifically for use on a Sony Laptop Editor or monitor. It does not contain the Automatique® or DIGITAL features, which are standard features on the QR-SDH/QR-DSR Gold Mounts. In a back-up situation, the QR-A200 can be used as a camera mount in place of the QR-SDH or QR-DSR.

To install the QR-A200 on the editor, simply slide the Gold Mount onto the "dove-tail" mount on the editor. The Gold Mount should "click" into place ensuring that it is locked into place.

Note: There are optional spacers located on the side of the bracket that are not required in this application. They can either be left on the bracket, or removed by breaking the spacer tabs flush with the side of the bracket.

The QR-A200 can be used on any piece of equipment which has a Sony V-Mount connection on it. As mentioned above, the QR-SDH or QR-DSR mounts should be used on cameras because of the additional features.
