QR-DVX Installation Instructions

This special Anton/Bauer® Gold Mount® bracket allows you to use your existing Logic Series® batteries to power a smaller, lower voltage 6 / 7.2 volt, camera. An internal DC to DC converter brings down the voltage of a 14.4 volt battery to 7.2 volts in order to power the camera. This is automatic. At the same time, the 14.4 volts is still applied to the PowerTap connector of the Gold Mount allowing you to power an Ultralight®, Ultralight 2, or any other piece of equipment which is powered from a 12 volt DC source (50 watts maximum).

Simply snap a battery onto the Gold Mount adapter and plug the power cord into the camera. Using a DIONIC®, HyTRON™ 50 battery will power the camera, without a light, for 3 to 8 hours or more. The small size of these batteries allows you to carry the battery with the supplied pouch, on your belt, for comfort and ease.

Use of unauthorized equipment in conjunction with Anton/Bauer products constitutes misuse under our warranties and may limit or void those warranties. Anton/Bauer does not authorize, condone, recommend, or otherwise assume any liability or responsibility resulting from the use of any battery, charger, or accessory made by Anton/Bauer manufacture with any battery, charger, or accessory not manufactured, produced or sold by Anton/Bauer. Anton/Bauer only authorizes the use of original Anton/Bauer product with this product. Use only original Anton/Bauer equipment with this product.
