

One World. One Smart Choice®

QR-VBG

Installation Instructions

This special Anton/Bauer® Gold Mount® bracket allows you to use your existing Logic Series® batteries to power any Panasonic® camera that is compatible with the Panasonic model VVVBG series batteries. An internal DC to DC converter automatically brings down the voltage of a 14.4 volt battery to 7.2 volts in order to power the camera. Simply snap a battery onto the Gold Mount adapter and plug the power cord into the camera. The bracket's on-board PowerTap® also provides an additional 14.4 VDC nominal auxiliary DC output for Ultralight 2, or any other piece of equipment that may be powered by a 12 VDC (11-17VDC) DC source (50 watts maximum). The small size of DIONIC® 90, or HyTRON® 50 batteries allows you to carry them in the supplied pouch on your belt for comfort and ease. Any other Anton/Bauer battery can be used on this mount, however, due to size; they cannot fit into the pouch.

The QR-VBG can be mounted to various third party shoulder support systems such as RedRock® Micro*, Cinevate®, Shape®, Zacuto®, and others that incorporate the Anton/Bauer mounting hole pattern in their design. This can be achieved by removing the sheet metal back plate on the QR-VBG and then using the existing four (4) screws to attach the QR-VBG to the shoulder support system.

*If attaching to a RedRock Microsystems cheese plate you may need one (1) back plate (P/N 5115-0405), and four (4) screws (P/N 6120-5522).

Use of unauthorized equipment in conjunction with Anton/Bauer products constitutes misuse under our warranties and may limit or void those warranties. Anton/Bauer does not authorize, condone, recommend, or otherwise assume any liability or responsibility resulting from the use of any battery, charger, or accessory made by Anton/Bauer with any battery, charger, or accessory not manufactured, produced or sold by Anton/Bauer unless otherwise indicated.
