

## AT8464 (black) | AT8464-TH (beige) Dual-Ear Microphone Mount

Audio-Technica's Dual-Ear Microphone Mount allows you to convert your single ear-worn BP892 MicroSet® to a dual-ear-worn unit for maximum stability and comfort. The BP892 fits on either side of the Dual-Ear Microphone Mount, allowing the microphone to be worn to either the left or right of your mouth. The headband easily adjusts to fit both children and adults.

### How to use the Dual-Ear Microphone Mount

- 1 Insert the rounded end of your BP892 ear hook into the larger opening of your Dual-Ear Microphone Mount's left or right tapered holder. Firmly seat ear hook in the tapered holder.
- 2 Insert the small rounded end of the additional supplied ear hook into the larger opening of your Dual-Ear Microphone Mount's remaining tapered holder. Firmly seat ear hook in the tapered holder.
- 3 Open the Dual-Ear Microphone Mount's adjustable behind-the-neck headband to its maximum position by pushing the headband's adjusting tabs together (a). Put the behind-the-neck headband on, hooking the ear hooks over your ears. Adjust the fit of the headband as needed, by sliding the headband's adjusting tabs until you arrive at a secure, comfortable fit (a). Attach the microphone cable to the cable clip positioned between the headband's adjusting tabs (b).
