## Access Universal Screen Controller (AXS17TVCX2)

Works with any brand Personal Viewing Screens and/or Cable/Satellite boxes.

The Access Universal Screen Controller is the only Personal Screen Controller that is compatible with other manufacturer's Personal Viewing Screens. The AXS17TVCX2 controller is loaded with features including the energy saving auto-off feature developed to help decrease utility costs for club operators and conserve energy.

This exclusive product from Broadcastvision also allows the user to operate Cable & Satellite receiver boxes in conjunction with any manufacturer's personal viewing screens eliminating the need for a burdensome handheld remote control.

The Access Universal Controller is compatible with the following Personal Viewing Screen Brands and many others:

**CARDIO THEATER®**  
**FANTAAY®**  
**MATRIX®**  
**PRECOR®**

**CARDIOVISION®**  
**LIFE FITNESS®**  
**MYE ENTERTAINMENT®**  
**STARTRAC®**

## Access Universal Screen Controller (Cable/Satellite Receiver Control)

This feature was designed for customers who are upgrading to digital TV and are required by the cable/satellite provider to connect a receiver box on each piece of cardio equipment. The AXS17TVCX2 is an affordable solution that will allow the user to eliminate the handheld remote control unit provided by the Cable/Satellite provider. The Access controller is simply connected to the cable/satellite box and the personal viewing screen. Club owners are spared having to use battery operated, breakage and theft prone handheld remotes.

The AXS17TVCX2 is the only universal controller that allows the user to operate Cable/Satellite Receiver boxes in conjunction with any manufacturer's personal viewing screens, without the need for an additional handheld remote control unit. The user can control the personal viewing screen with just the AXS17TVCX2 universal controller.

The Access Universal Controller is compatible with the following Cable/Satellite Receivers:

**DIRECTV®**  
**COMCAST®**  
**HAIVISION®**  
**TIME WARNER CABLE®**

**DISH®**  
**CABLEVISION®**  
**MOTOROLA®**  
**And More... Call for Details!**

## CAB (Console Adapter Box) – AXSCAB-01

Eliminate the handheld remote control required by cable/satellite providers

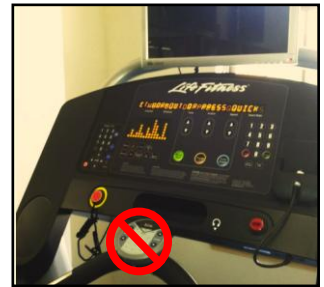

Use existing integrated controls on cardio equipment when installing Broadcastvision 15" and 17" Personal Viewing Screens (or any other brand PVS) and/or to eliminate handheld remote controls provided by Cable/Satellite providers.

The CAB (console adapter box) connects to the back of the PVS to adapt screens for on-console button control. The CAB will also adapt console or attachable controllers to operate ANY cable/satellite set top box. This eliminates handheld remote controls required by cable/satellite providers and provides more flexibility at less cost compared to expensive head-end modulating gear.

The CAB is small (3"x1.5"x.74"), compatible with the most popular cardio equipment brands and cable/satellite providers, and can be expanded for your application: LIFE FITNESS®, PRECOR/CARDIO THEATER®, MATRIX®, STARTRAC®, CYBEX®, Comcast®, TimeWarner®, DISH®, DirecTV®, Motorola®, AT&T Uverse®, Verizon Vios®, IPTV®, Haivision®, Cablevision® and others.

### To order: Contact us with these 3 pieces of information:

1. Cardio equipment console brand and model
2. PVS brand and model
3. Cable or Satellite set-top box brand and model (if applicable)

An attached controller is no longer required
