

...competitive technologies with compelling value

Features:

- Distributes HDMI signal over a single Cat5e or Cat6 4 Pair cable
- Extends transmission distance up to 230' from sources up to 1080p
- · No settings or adjustments required
- Uses a single UTP LAN cable (CAT-5e / 6)
- UTP cable termination follows the standards of IEEE-568B
- · Auto-adjustment of feedback, equalization & amplification
- HDMI V1.4 supported
- · HDCP compliant
- Supports 1080p @ 60Hz @ 48 b/pixels, 3D and 4Kx2K
- · LED indicators indicate power and video signal status
- Internal ESD protection
- · Mounting ears included
- · Supports two way Infrared control signals
- Units can be cascaded.

CT-HDVD-EXT-IR230 HD & Infrared Control Over a Single Cat5e / 6

Description:

The CT-HDVD-EXT-IR230 kit has the ability to transmit and receive a 1080p HD source up to 230 feet along with Infrared control over a single Cat5e / Cat6 4 Pair UTP Cable. With a single low cost CAT-5e/6 cable, users can readily extend HDTV sources from DVD players, PS3, PC, and many other sources compliant with TMDS to distant display monitors including HD enabled TV sets or LCD PC monitors. This cost effective flexibility allows HDCP compliant DVD players or PS3 to transmit high quality video and audio with a greater distance at a minimal cost.

The transmitting unit is used to capture the input HD signal and carries the signal over a single RJ-45 connector through the Cat-5e / 6 cable. The receiving unit is responsible for receiving and equalizing the transmitted TMDS multimedia data.

0.5-1.0 volts p-p

Package Contents:

- 1 Base transmission unit
- 1 Base receive unit
- 2 Mounting ears (2 Pair)
- 1 Operating Instructions
- 2 5VDC power supply
- 1 IR emitter cable
- 1 IR target cable
