

ChannelPlus Model 2619 Rack-mount Grid System

The ChannelPlus Model 2619 Rack-mount Grid System is another innovative product from Multiplex Technology, Inc. The 2619 is the first of its kind to facilitate integration of ChannelPlus structured wired products into an EIA 19-inch (48,3 cm) standard rack.

This new CEDIA style 19-inch rack system is designed to be used with the DA series of distribution amplifiers, 8157 Broadband gateway, and new telephone and data products. It is an extremely versatile system offering both rack and surface mount versions in one box.

Features and Benefits:

- *Quickly assembled*
- *Flat packed, easy to ship and store*
- *Integrated mounting holes for standard 16-inch studs*
- *Compatible with forthcoming DA series with rack ears for snapping directly into the grid.*

Market Positioning

The 2619 Rack-mount grid system builds on its sister series, the patented OpenHouse grid system, to support the new line of ChannelPlus Structured wire products.

ChannelPlus is the first company to offer a structured wire system for a 19-inch rack. The ChannelPlus Model 2619 Rack-mount system is designed for the home theater and custom home markets, which require larger, more elaborate structured wire systems. Designed with flexibility and ease of use, the new 2619 will allow the integrator to bring the convenience of structured wire to any type of installation using the 19-inch rack system

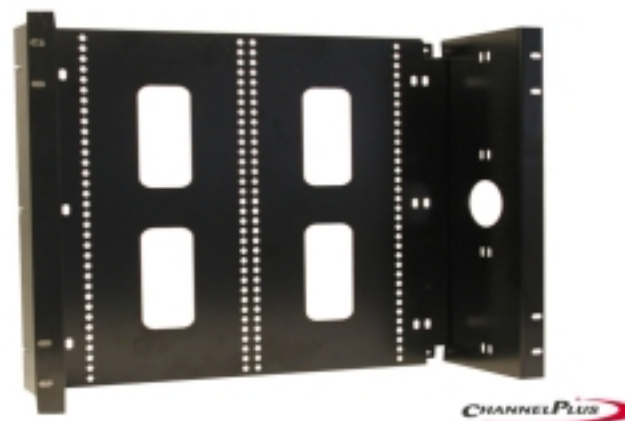

Designed and engineered by Multiplex Technology, Inc., the leader in residential video solutions. Known for its innovative line of ChannelPlus products, MTI has lead the way in the design and development of high-performance, multi-room video distribution equipment for home automation and entertainment since 1983.
