

PROJECTION CARTS

Use for Projectors and More

- The height of both the upper and lower shelves of Stand Master I can be adjusted simply and safely with the gas pneumatic spring system. The Stand Master II is height adjustable in a continuous movement using a crank.
- Stand Master features two sturdy 5" wheels for easy pulling and moving from location to location.
- The PH 800-1250 with telescoping center column adjusts in height in 2" increments from 21-1/2" - 49-1/2". Supports up to 70 lbs. Ideal for overhead, LCD and slide projectors. Built in safety rails prevent equipment from sliding off.
- The APT2-42 features an 18" x 24" adjustable projector shelf that is ideal for use with LCD and DLP projectors and a swivel laptop shelf.
