DVP-100
## *Teleprompting System*

MSRP: $475

DVP-100 is a wireless teleprompting system designed to centrally control multiple prompter screens. The dv Prompter Pro server creates its own WiFi hotspot ready for you to connect your devices and start prompting. Once connected, you simply need to select if the device is to be a controller or a prompter screen. Up to 6 devices can be connected to the server simultaneously. The controller can create and load new scripts, control the scrolling and perform live edits on all prompter screens in real time. All scripts and settings are stored on the dvPrompter server not the devices themselves.

DVP-100 WORKFLOW

Controller
Create and load scripts, control scrolling and perform live edits on all prompter screens.

Script Distribution
Compatible with MAC, PC, and Android and iOS devices.

DVP-100 FEATURES

- Multiple users can collaborate to the scripts library over IP
- Built in dual band WiFi
- Compatible with WR-450 Bluetooth controller to facilitate talent script control
- Small form factor, rack mountable using RMK-2
- 12V DC input

APPLICATIONS

Education

Create a morning announcement with two news anchors. Each anchor can have their own script with a teleprompter to guide them every step of the way. DVP-100 is easy to use so another student can easily manage and monitor the prompting scripts.

Broadcast

Ideal for news programs with two anchors. Simply load up your script to the DV Prompter server and the DVP-100 allows you to sync up multiple teleprompters for seamless news delivery.
