INTERCOMS & TALLY LIGHTS

Intercom & Tally Systems

Datavideo's line of intercom and tally systems allows constant communication between the switcher operator and camera crew. The setups easily integrate with all Datavideo Switchers, syncing the tally lights with the switchers' "live" and "next" operations.

In addition, ITC-100 and TB-5 are made with **locking power connectors** for added security.

HP-1 & HP-2 Headsets

ITC-100 comes with the standard MC-1 Headsets. Also available are the special HP-1 and HP-2 Headsets.

CB-29 Tally Cable

Use the CB-29 Cable to connect the ITC-100 Intercom/Tally System to the SE-3000 Switcher.

CB-28 Tally Cable

Use the CB-29 Cable to connect the ITC-100 Intercom/Tally System to the SE-2800 Switcher.

ITC-100 Intercom/Tally System

Datavideo's ITC-100 is a practical eight remote-user and base station intercom with included tally lights that can use low cost headsets (included) or high quality professional units. Users are connected to the base station via belt packs and 20 meter 5-pin XLR audio cables that may be extended up to 200 meters/650 feet.

TB-5 Tally Light Kit

The TB-5 Tally Box is an accessory for Datavideo switchers. It takes tally commands from the switcher and lights up to four tally lights to indicate "next up" and "live". The tally lights are connected and powered by mini phono plugs. Each TB-5 unit comes packaged with four tally lights, one cable for each light, serial cable to connect to the switcher, and a power adapter. Use two sets of TB-5s for up to 8 tally lights when connected to switchers with more than 4 inputs, like the SE-900.

Switcher → TB-5 Tally Box → Tally Light #1, Tally Light #2, Tally Light #3, Tally Light #4

TB-5 is compatible with Datavideo SE-3000, 2800-Series, 2000-Series, 900-Series, 600-Series, and 500-Series switchers.
