

Models: RL-I, RL-LED, GN-I, GN-LED

GN-LED

Light up Your Rack!

Whether you need illumination for the front or the rear of your rack - Furman offers a convenient solution in either incandescent or LED form.

Front Rack Lights (RL-I, RL-LED)

These sturdy units mount conveniently into one 19" rack space providing light from two gooseneck LED or incandescent bulbs. A dimmer switch on the front panel allows you to easily adjust the light to exactly the amount desired. The RL-I and RL-LED are powered by a detachable 6' cord with an enclosed 12 VAC power supply inside the AC plug (wall wart). This cord / supply is conveniently attached to the rear of the panel by a 2.1 mm barrel connection, allowing fast, reliable operation. The cool, energy-efficient LED's in the RL-LED feature an extremely long life span, while both the RL-LED and the RL-I have replaceable heads / bulbs, so you can keep your rack lit indefinitely.

Rear Rack Lights (GN-I, GN-LED)

The Furman Gooseneck Lights are the perfect accessory for any Series II Power Conditioner. All of the Series II units are designed with a rear BNC connector to accommodate either a GN-I or GN-LED for rear rack illumination. These flexible 12 inch lights provide an ample amount of light and can be controlled by an on/off switch located on the front of the unit. In addition to their use with Furman Series II Power Conditioners, the versatile GN-I and GN-LED will work with a variety of other products in various applications. The replaceable head / bulb (depending on the model) provides for virtually indefinite use. Get a Furman Rack Light and see what you've been missing!
