G-TOUR-LCDLIFT-50P
Assembly Instructions

Tools needed:
- Ratchet or nut driver set
- Phillips Screwdriver
- Razor Knife
- Assistant

Instructions for Unpacking

The G-TOUR-LCDLIFT-50P is packaged on a rugged shipping pallet to protect the casters during shipping.
1) Using a razor knife, cut away straps that hold the cardboard cover on the case
2) Be careful to cut away from the box as to not pierce the box and damage the exterior of the case.
3) The main body of the cardboard will then lift off the case.
4) Then the entire case must be lifted off the shipping pallet to free the casters and the case from its packaging.

Instructions for Mounting

WARNING!!!! Do not remove "Lock Block" and or activate the red release mechanism prior to mounting the screen onto the lift.
1) Lock wheels for stability during screen mounting
2) Remove lid

3) Locate mounting hardware in lower left section of case. Hardware is held in case with laptop tray storage straps

4) Mount (2) parallel mounting rails to rear of your screen

5) With the help of an assistant, lift screen onto the universal mount which is already mounted to the Case Lift Mechanism.

6) Center screen in desired position

7) Tighten restraining bolts on mounting rail to prevent screen from lifting away from universal mount.

Operating Instructions

1) Remove "Lock Block" by removing lock bolt.
2) With left hand, push lift mechanism down 3 to 4 inches by using the "cross bar" handle on the rear of the mount.
3) Then while holding mechanism down, press the red release lever and hold it down
4) Release the "cross bar" handle
5) Once the lift begins to rise, then you may release the red release lever.
6) The lift will default to its highest position

7) Using the "cross bar" handle, you can adjust the height by pulling the lift downward until a "click" is heard.
