

One HDMI 1.3 Source to 3 HDMI Displays

EXT-HDMI1.3-143

Distribute one HDMI 1.3 source to three displays

The Gefen 1:3 Splitter for HDMI 1.3 allows AV sources such as Blu-ray players and set-top boxes to be displayed on up to 3 High Definition Displays simultaneously. Two or more splitters may be connected together to create a larger distribution.

The Gefen 1:3 Splitter for HDMI 1.3 is connected using an HDMI cable from the HD source to the product's input. There are three HDMI outputs. Each output can be connected to an HDTV display. The 5V power supply is connected to the Splitter for HDMI 1.3. All connected displays then show an exact replica of the HD signal.
