

Switch Between Four Hi-Def Sources to Two HDTV Displays Simultaneously

EXT-HDMI1.3-442

Split HDMI 1.3 to 2 HDTV Displays -- with additional optical digital audio output

Gefen's 4x2 Switcher for HDMI 1.3 has four HDMI inputs and two HDMI outputs. Up to four HD audio/video sources are connected at one time to the HDMI inputs such as satellite systems and Blu-Ray players. Two mirrored HDMI outputs send HD audio/video signals to two HDTV displays simultaneously. A convenient S/PDIF digital audio out allows connection to an external audio video receiver if desired. Switching is done via the included IR remote.

How It Works

Connect four HD audio/video sources to the 4x2 Switcher for HDMI 1.3's inputs. Connect two displays to the HDMI outputs. An external amplifier or receiver can be connected to the S/PDIF digital audio output on the rear of the switcher if desired. Once the sources, the switcher and the displays are powered and connected, select which source to view of four using the IR remote.
