

MMIO ADA

1x4 analog audio distribution

Based on Mini MIO BOX platform, MMIO ADA is a high-quality distribution which can distribute one analog audio to four analog audio outputs, the mini-size unit of 96.7x65x28 mm.

The LED lights on the Mini box indicate the status of input signal and power supply, in order to let the user know the status immediately.

Key Features

Technical Specification

Analog audio input:

Input interface: 3pin connection (balanced)

Impedance: 600Ω

Frequency response: 20Hz-20Khz <±0.25dB

Analog audio output:

Output interface: 3pin connection (balanced or unbalanced)

Impedance: 600Ω

Frequency response: 20Hz-20 KHz <±0.25dB

Status indicator:

Input signal status indicator

Power supply indicator

(Indicate by shining or extinguishing of the green LED)

Power consumption:

Power: 12VDC 1A

Dimension: 96.7x65x28 mm
