

# CountDown touch

**CountDown Touch** is a new concept in control, with an intuitive touch screen to give direct access to control the time of your presentation. We have designed this in collaboration with the people who use it, where the operation of a timer system has to be simple, quick and changeable.

The system can count down, count up and show real time of day. Each of the 3 colour time change periods can be reset whilst running. Even the total time can be reduced or increased as the show takes shape.

The unit is AC Mains powered with 2 XLR connectors for the numeric Big Display, Standard and Mini displays and the CombiLamp and CombiTower to give a tailored system for your presenters to run to time. Complete with 4 memory locations for fast preprogrammed times and an option to count past Zero when in countdown mode.

## Main Features

- ✓ Direct touch control
- ✓ CountDown past Zero with minus sign on current displays
- ✓ Increment or decrement time during a CountDown or CountUp
- ✓ Change colour directly
- ✓ 12h and 24h real time clock
- ✓ Firmware field updateable
- ✓ Multi language

## Right Time Right Now

## 3 Year Limited Factory Warranty

## Specifications
