PC Bal Box

PC Balance Box eliminates hum problems when connecting audio from your presentation PC. Hum can happen anywhere. You don't have to be running your audio signal a long distance. Power supplies, fluorescent lights and all sorts of equipment can cause noise that is picked up by your audio input cables.

Main Features

- ✓ Stereo/Mono Selection Switch
- ✓ 20dB pad switch allows audio to be input on either line or mic connections
- ✓ Earth (Ground) Isolation ensures that ground loops are easily defeated
- ✓ Left/Right XLR output connectors are standard for live events audio
- ✓ Compact size
- ✓ No power required (passive) - always ready to go
- ✓ Captive lead ensures easy connection every time
