Connect Your Computer to Your TV Wirelessly [Wireless HDMI & Wireless VGA]

IOGEAR is proud to announce the Wireless 1080p Computer to HD Display Kit. This brand new solution delivers High Definition video up to 1080p from your PC computer to your home entertainment center wirelessly up to 30 feet. With the utilization of the very latest Ultra-Wide Band (UWB) Wireless USB technology, wireless multimedia streaming is now more stable and more resistant to interferences than ever before.

Enjoy your computer content on a big screen without cables stretching across the room.

Complete wireless PC to HDTV solution

- Surf the Internet and experience your favorite online shows from the comfort of your couch
- View your photos and slideshows on the big screen with your friends and family
- Display presentations and content wirelessly using a projector for business meetings
- Stream music library or Internet radio from your computer to your home theater system
- Extend your laptop screen to the HDTV while working on your laptop

The GUWAVKIT4B's receiver is able to associate with up to 8 USB transmitter's. Offers first come first serve wireless transmission, perfect for conference rooms, boardrooms and classrooms. Purchasing an additional back up transmitter dongle serves as a simple solution for separate location usage.

The Wireless 1080p Computer to HD Display Kit provides line-of-sight, in-room transmission up to 30 feet, and is easy to install and operate. Plus, it is an ideal solution for both home and office use.

Wireless 1080p Computer to HD Display Kit

How does it work?

- After installation of software & drivers, plug in the Wireless USB Transmitter to the USB port on your PC computer
- Browse the Internet, view pictures, stream video and music from your computer to your TV wirelessly
- Connect the Wireless Receiver to your TV via the HD or VGA & audio cable. Make sure the receiver is in line-of-sight of the transmitter
