

RemoteAmp Blue

WIRELESS HEADPHONE AMPLIFIER

FEATURES

- *Bluetooth* Wireless Technology
- XLR Line Level Input
- 3.5 mm Stereo Line level input
- 3.5 mm Earpiece Jack
- 1/4" Stereo Headphone Jack
- Compatible with Party Line Intercoms
- >10 Hours on one 9 Volt Battery

JK Audio combines *Bluetooth* Wireless Technology with professional audio electronics in a rugged new belt pack design.

RemoteAmp Blue allows IFB monitoring through a cell phone equipped with *Bluetooth* Wireless Technology. This is a listen only connection designed for voice IFB or full bandwidth stereo music listening.

RemoteAmp Blue pairs to your cell phone like any Bluetooth wireless headset. The line input jacks and separate volume controls allow wired operation in parallel with the Bluetooth connection. The XLR line level input accepts either a balanced mono signal, or a party line intercom feed (listen-only). The 1/2 watt, 1/4" stereo headphone jack will cut through any crowd noise. Connect an IFB earpiece to the 3.5 mm earpiece jack for operation.

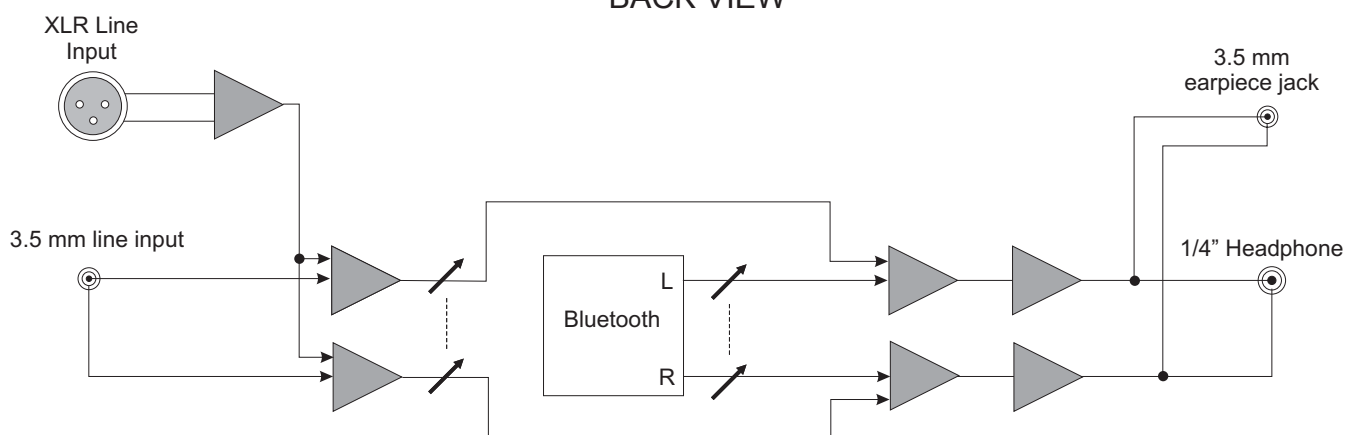

BluePack also pairs to *Bluetooth* equipped sound cards and music players in full bandwidth A2DP stereo mode.
