Size:	5" x 3.25" x 1.125" (13 x 9 x 3 cm)
Weight:	1 lb (450 grams)

RIU-IP REMOTE IP INTERFACE

The RIU-IP is a remote control interface designed for the new innkeeper 1x, innkeeper 2, and innkeeper 4 digital hybrids. This unit contains a web server which allows the user to send and receive control data through their web browser. RIU-IP can be connected to the user's computer NIC card for direct control, to a switch or hub for network control, or to an ethernet port with internet access for control from anywhere in the world.
