

Lighting in a Box

- Full Dimming and Scene Control
- Excellent Start Up System
- Plugs into a Standard Wall Outlet
- Expandable
- Portable
- DMX-512

Lighting System in a Box is ideal for solo performers, small bands, and rental applications. It is completely portable and self contained. Lightronics equipment assures quality and value from the very beginning. Rugged construction and advanced design ensures that your system will stand up to the rigors of touring and daily use. All of the consoles provide full multi scene dimming control plus prestored scenes and chase functions. Ease of operation enables you to concentrate on the performance and not the equipment.

This excellent start up system is easily expandable and all equipment uses industry standard 5 pin DMX-512 control signals. An upgrade package is available which adds additional dimmers and lights.

Lighting System in a Box is a reliable, professional system that will have you up and running in record time at an economical price.
