# LA-140-GY Stationary IR Radiator

#### **Configuration:**

LA-140-GY Stationary IR Radiator -Grey LA-140-WH Stationary IR Radiator -White

#### **Product Overview:**

The LA-140 IR radiator/emitter packs high infrared power in a small and attractive design, with your choice of grey or white packaging. Designed for easy installation using standard components, the LA-140 is powered via CAT-5 cabling while the RF modulated carriers are delivered via standard coax cable. Mounting brackets are included for wall, ceiling, desk, mic stand and tripod mounting. Power can be supplied by the LT-82 transmitter or from a separate power supply (LA-205). Built-in delay compensation prevents signal cancellation (multi-path) problems and eliminates the piled-up cabling that is required with other systems. The LA-140 is used for government compliance (such as ADA), assistive listening, language interpretation, live theatre, houses of worship, courtrooms, secure rooms and for auditory description. Available in both grey and white.

#### Highlights:

- Outstanding coverage 10,000 ft<sup>2</sup> (929 m<sup>2</sup>)
- Two (2) radiators can be powered from a single LT-82 transmitter or optional power supply using standard CAT-5 cabling eliminating the need for multiple cables
- White or grey color allows for a variety of aesthetic settings
- · Includes wall, ceiling, desk, mic stand and tripod mounting brackets gives multiple options for mounting
- Units can be horizontally or vertically mounted together doubles the power in a small footprint
- · Radiator diodes are turned off if no audio signal is present at the transmitter after 30 minutes saves radiator diode life
- · Delay compensation ensures no drop out in the IR signal

#### Includes:

One (1) LA-140 Stationary IR Radiator

One (1) Mounting hardware (allows for wall, ceiling, desk, mic stand and tripod mounting)

Twenty-five (25) ft. (7.6 m) of coax cable, matched color

Twenty-five (25) ft. (7.6 m) of CAT-5 cable, matched color

One (1) Quick Reference Card

Up to two LA-140 radiators can be powered by one LT-82. If additional power is required, order an additional power supply.

#### Architectural Specification:

The radiator-emitter shall have a single carrier transmitting area of no less than 10,000 ft<sup>2</sup> (929 m<sup>2</sup>) or greater for each radiator specified when used with specified receiver. The radiator shall be powered via CAT-5 cabling and the RF from the transmitter shall be carried by 50 ohm coaxial cable. The radiator shall have three indicating LEDs for *power*, *no carrier present* and *carrier present*.

### LA-140-GY Stationary IR Radiator

The radiator LEDs shall be deactivated after 30 minutes if there is no audio signal present from the transmitter. The radiator shall come in a white or grey color and shall include all of the mounting hardware capable of mounting the radiator on a wall, on a ceiling, in a corner, on a desk, on a mic stand or on a tripod. The Listen LA-140 is specified.

Product Specification:Stationary IR Radiator  Controls		
Indicators		
Red LED	Indicates power is present.	
Yellow LED	Indicates no connection to transmitter or radiator.	
Green LED	Indicates carrier and power are present and radiator is emitting IR signal.	
RF		
Frequency Range	1 MHz - 5 MHz	
Input/s	BNC Connection25 dBm to -5 dBm input nominal	
Output/s	BNC Connection15 dBu nominal	
Coverage Area	10,000 ft² (929 m²) when used with Listen Receivers	
Power		
Power Supply Input	RJ-45 connector. 30 VDC, powered from transmitter via CAT-5 cable or optional LA-205 power supply.	
Power Supply Output	RJ-45 connector. 30 VDC, powers up to one additional radiator. (Maximum two radiators powered from each LT-82 transmitter or LA-205 power supply)	
Emitter Power	3 W	
Cable Length	250 ft. with (1) LT-82 and (2) LA-140 or 700 ft. with (1) LT-82 and (1) LA-140.	
Physical		
Color	LA-140-GY (Grey), LA-140-WH (White)	
Weight	2.1 lbs. (0.95 kg)	
Weight (Loaded)	2.4 lbs. (1.09 kg)	
Shipping Weight	6.0 lbs. (2.70 kg)	
Height	5.50 in. (140 mm)	
Width	8.00 in. (203 mm)	
Depth	2.60 in. (66 mm)	
Environmental		
Temperature - Operation	-14 °F (-10 °C) to +104 °F (40 °C)
