

**Configuration:**

LP-39-072-01 Intelligent  
DSP RF Receiver 4-Pack  
(72 MHz)

**Product Overview:**

The LP-39-072-01 is designed to make it easy to order all the components you need for an exceptional listening experience. Ideal for venues to upgrade a 72 MHz assistive listening system or expand an existing system with four iDSP receivers.

With Listen's unique DSP SQ™ noise reduction technology, users experience 20 dB less noise and hiss than any other listening device. Advanced green battery technology dramatically reduces costs of ownership and hassles while reducing the number of batteries in landfills. A field replaceable Lithium-ion battery is included with the unit. iDSP is the smallest device of its kind, making it easier to wear and easier for venues to dispense, store and maintain.

The LR-4200-072 has an OLED display to program channel names, monitor battery status, channel status, and charge activation. Connect the iDSP neck loop/lanyard or ear phones via two 3.5 mm output jacks (receivers can be shared). The Micro USB connection is used with free [iDSP software](#) for set up, programming, firmware updates, inventory management and charging.

**Highlights:**

- All-inclusive 4-pack is ideal for venues to upgrade an existing 72 MHz assistive listening systems or expand an iDSP Prime System
