FCC Compliance Statement

NOTE: This equipment has been tested and found to comply with the limits for a class B digital device pursuant to part 15 of the FCC rules.

These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential environment. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the unit off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiver.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet different from that which the receiver is connected.
- Consult your MYE dealer or experienced Radio / TV technician

INDUSTRY CANADA COMPLIANCE STATEMENT

- (1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

Special Features:

- **AUTO OFF Sensor**
- **Channel Default**
- **Auto Default – Private Network Channel Default**
- **FM Radio**

Auto OFF Sensor

The controller can be set to monitor for the absence of vibration for 10 minutes. Should this occur, the console can automatically power OFF the TV and controller, saving energy and extending product life.

To Enable the Auto OFF Sensor:

Note: Factory default is "Disabled."

1. Press the "Scan & CC" buttons simultaneously for 3-5 seconds until the word "OFF" is displayed
2. Press the "TV" button to turn the feature ON.
3. Press the "EQ" button or wait 5 seconds to set and exit.

To Disable the Auto OFF Sensor

1. Press the "Scan & CC" buttons simultaneously for 3-5 seconds until the word "OFF" is displayed.
2. Press the "EQ" button or wait 5 seconds to set and exit.

Channel Default

This feature allows the LCD TV to default to a preset TV channel when turned ON. When a default channel has been programmed into the controller the TV will turn on but change to a predetermined channel during which time it will lock out the user key pad functions for 10 seconds. Note: Factory default is 'Off'.

To set a Default TV Channel:

1. Press the "1 & 3" keys simultaneously for 3-4 seconds. The word "Off" will flash in the display.
2. Press the "1" key to enter Channel Default set up mode.
3. Select the desired default TV channel number by pressing the direct access numeric keys including the DASH key for digital channels.
4. Press the "EQ" button or wait 5 seconds to set and exit.

Disable Channel Default

1. Press the "1 & 3" keys simultaneously for 3-4 seconds. The word "Off" will appear in the display.
2. Press the "EQ" button or wait 5 seconds to set and exit.

Auto Default – Private Network Channel Default

Exclusive feature works with in-club private TV networks including ClubCom™ and Digital Signage systems.

This feature allows the LCD TV to default to a preset TV channel when turned ON, wait a user set delay time then default to a second preset TV channel (Home). During the preset delay time the user will be unable to use the key pad functions and the controller's display will count down the remaining seconds of the lock out. Once normal viewing has started and no activity is detected by the controller (no vibration) for a period of 10 minutes the TV channel will automatically default back to the second predetermined TV channel (Home). Also, if at any time during use the HOME key is pressed the TV will automatically switch to HOME. Auto Default can be turned off by enabling Channel Default or by selecting OFF when entering the set up mode. Note: Factory default is OFF.

To set the Auto Default TV Channels:

1. Press the "1 & 3" keys simultaneously for 3-4 seconds. The word "Off" will flash in the display.
2. Press the "2" key to enter Auto Default set up mode.
3. Select the first desired default TV channel number by pressing the direct access numeric keys.
4. Press the "EQ" button or wait 5 seconds to set.
5. Select the second desired default TV channel (HOME) by pressing the direct access numeric keys.
6. Press the "EQ" button or wait 5 seconds to set.
7. A TIME number will appear. Press CHANNEL UP button to scroll through the available time settings (5, 10, 15, 20, 25, 30) Note: Factory default is 30 seconds.
8. Press the "EQ" button to set the above information or wait 5 seconds to set.

Disable Auto Default

To disable Auto Default (only):

1. Press the “1 & 3” keys simultaneously for 3-4 seconds. The word “Off” will flash in the display.
2. Press the “2” key to enter Auto Default set up mode.
3. Select “0” as the desired TV Default Channel.
4. Program will automatically move to HOME default channel entry.
5. Select “0” again as the desired Auto Channel default channel (HOME).
6. Program will automatically accept and exit Auto Default program mode.

To disable Auto Default & Channel Default:

1. Press the “1 & 3” keys simultaneously for 3-4 seconds. The word “Off” will flash in the display.
2. Press the “EQ” button or wait 5 seconds to set and exit.

FM RADIO

Pressing the “FM” key switches the audio mode from TV to FM radio. Users can press the SCAN key or channel UP / DOWN keys to move to next available FM channel. They can also use the number keys to direct access a radio station frequency. (Ex: 101.5)

The FM Radio Presets may be erased by holding down the FM button down for three seconds at power up. The **FM** and **TV** icons will both be displayed, indicating that the erasure has taken place however Channel 1 will always retain 1 frequency.

Attaching the Controller

USE only MYE Entertainment cables with all MYE Entertainment receiver controllers. MYE Entertainment will not be responsible for damage to controllers or cardio equipment when alternate cables or power adapters are used.

Wrap the Secure Grip Band around the intended mounting pole and cut to fit. Do not overlap ends or have a gap over 1/8". Secure the Grip Band with 1 nylon tie in the center channel. OFFSET the knuckle of the nylon tie from center by approximately 1/4". Trim the excess nylon tie completely.

Install the Mounting Base over the nylon tie knuckle. Insert two nylon ties into the holes opposite the tie knuckle hole.

Seat the nylon ties into the corresponding channels of the Secure Grip Band.

Pull the nylon ties tight to align all 3 tie knuckles. Trim all excess nylon tie completely.

Attaching the Controller – cont.

Position and install the Rear Flange onto the Mounting Base. Interlocking gears assure secure positioning regardless of the rotation.

Insert one end of the controller cable into the RJ45 jack on the back of the receiver assembly. Insert the other end of the controller cable in the MYE TV RJ45 port. See TV manual for additional information.

Route the cable through the appropriate rubber cable blocks A, B or C depending on where you need the cable to exit the receiver flange.

Align and attach the controller assembly to the Rear Flange using the Front Flange mounting screws.

USE only MYE Entertainment cables with all MYE Entertainment receiver controllers. MYE Entertainment will not be responsible for damage to controllers or cardio equipment when alternate or other cables are used.

IntelliJack - Self Diagnostic Headphone Jack

The IntelliJack self diagnostic headphone circuit detects when the headphone jack has failed or been damaged. When a faulty headphone jack is detected, a flashing “headphone” icon appears in the LCD display. It will remain on until a new jack is installed and the icon reset.

To Replace the Intellijack:

1. Loosen the two screws evenly on the bottom of the IntelliJack module and remove.
2. Carefully insert new IntelliJack module without bending contact pins.
3. Reset the Icon. Turn MYE Controller OFF then press and hold the “Power” button for 3-4 seconds. When the icon appears again release the Power button.

IMPORTANT NOTICE: Defective user headphones may also trigger the faulty headphone jack icon. It is important to audibly test the headphone jack prior to replacement. If the problem was triggered by faulty headphones the icon may be reset by plugging in known good headphones for at least 10 seconds or following step #3 above.
