

ModuLine Insert Panels • for FMCA series and AW 2000

- Attractive satin black 14 gauge steel with scratch resistant powder coated finish
- All XLR type panels are reversible to accept Neutrik® D series or SwitchCraft® D3F connectors
- MPK and MPU accept all Mystery Electronics FlexiConn series connectors
- Compatible with many decora devices as well as Extron® MAAP and AAP

ModuLine Insert Panels are fully interchangeable between FMCA series floor boxes and the AW2000 All Weather Enclosure.*

Proprietary modular panel design accommodates a wide variety of AV connectors and active devices, as well as Neutrik® PowerConn series connectors.

Mystery Electronics floor boxes are ideal for classrooms, houses of worship, conference rooms, courtrooms, performance venues or anywhere connections are needed in the floor.

A&E specification

ModuLine Insert Panels

ModuLine Insert Panels shall be of 14 gauge steel, shall accommodate ___ (specify quantity) connectors, and shall be removable for installation and service without disassembling Cover, Gasket or Basket. All components shall conform to all applicable standards of the National Electrical Code. ModuLine Insert Panel(s) shall be _____.

*For greater flexibility, MPK, MPM and MPU accept all Mystery Electronics FlexiConn system connectors. The MPR (duplex power) is not available for the AW2000 All Weather Enclosure. Consult website for additional panel offerings.
