ACCESSORIES

Models **D-RGB1, DB-RG1, DS-RGB1** **Component Video RGB Connection Plate**

- Component Video Input or Output Panel
- RGB video Input on RCA Jacks
- Video Output on Detachable Terminal Block
- Available in RDL White/Gray (D-RGB1)
- Available in RDL Stainless Steel (DS-RGB1)
- Available in RDL Black (DB-RGB1)

The D-SERIES-RGB1 are Decora®-compatible video accessories from Radio Design Labs. All metal enclosures are attractively finished in white, black or brushed stainless steel to complement the decor encountered in commercial environments. Custom labeling is available at www.rdl.net.

The D SERIES-RGB1 is the ideal choice in installations requiring a wall-mounted component video input or output. The panel is typically installed as an input plate, but may equally be used as an output jack panel.

The front panel features three RCA jacks, intended for a component video source. The video signals are fed to a rear-panel detachable terminal block.

The D SERIES-RGB1 is the ideal choice to connect component video sources to a video monitor or projector in meeting rooms, classrooms and other A/V systems.
