

This is a standard audio output. It can be connected to any line level mixer, recorder or amplifier. To listen to the output of the smart phone.

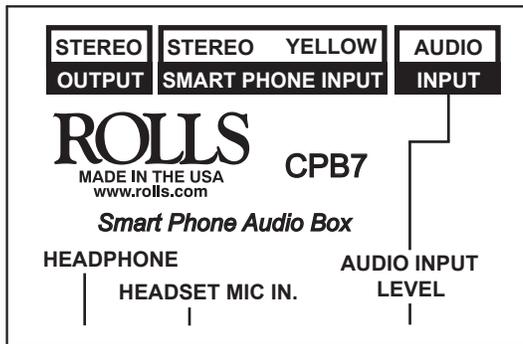

INCLUDED RCA CABLE

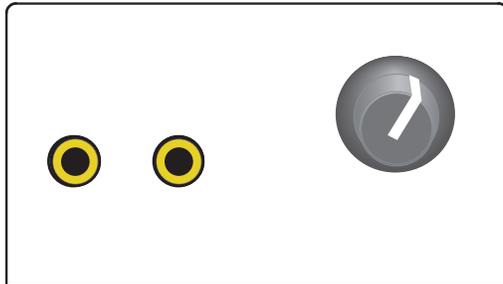

SMART PHONE

The audio input is a single RCA connector. Designed to work with any line level signal.

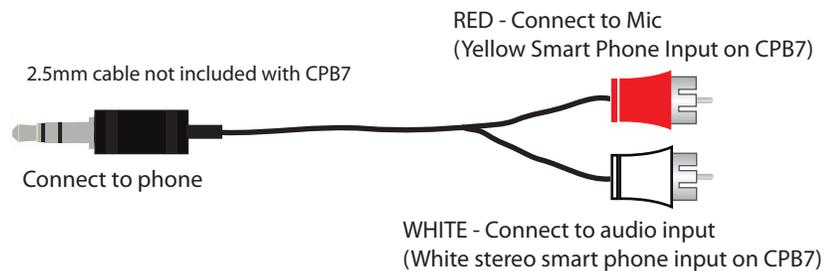

The CPB7 is a smart phone breakout box. It allows you to connect various inputs and outputs to your smart phone.

The CPB7 is completely passive, requires no power.

The head set must be TRS headphone and TRS MIC. If it is not as pictured it will not be compatible with the CPB7.

Diagram for use with older NON Smart phone (2.5mm type input)

When using 2.5mm configuration you will only have mono operation for the audio section.
