

RMX-4CD

4 Channel Color Triplex Multiplexer

Our 4 channel color triplex multiplexer allows the viewing of up to 4 image sources live on one screen, while simultaneously recording full screen images on a VCR and playback at the same time. It has an array of features. Viewing options include full-screen, multi-screen, or sequential switching with adjustable dwell time. During VCR playback, full-screen and multi-screen viewing options are available. It is uniquely programmable for recording between 2 - 999 hours. It conveniently has a built-in time and date generator with an 8 character camera title function. The video loss alert and alarm detection are standard. The best part is the RMX-4CD's compatibility with most time lapse VCR's and DVR's.

Specifications

Camera Inputs	BNC, 4, composite video 1.0 Vp-p 75 ohms
Viewing Options	Multi screen real-time display-1 ch, quad, PIP, 4live/4-playback
Adjustable Program Recording	2-999 hours-accepts trigger pulses from VCR's & DVR's
