

USB PS2 KVM Console Extender Cat5 Extender - 500 ft

StarTech ID: SV565UTP

The SV565UTP USB PS2 KVM console extender lets you control a server, computer or multiple computers (connected through KVM switch) over a standard Cat5 or Cat6 UTP network cable connection, at distances of up to 500 ft (150 m) away.

Use your existing keyboard, mouse, and monitor to access both the server room and your office computer, saving space and avoiding the need for a dedicated remote console by allowing you to switch between workstation view and KVM view at the remote location.

For added convenience, the Console/KVM extender supports both USB and PS/2 computer connections, and is compatible with any brand of KVM Switch.

Backed by a StarTech.com 2-year warranty and free lifetime technical support.

Applications

- Access one or more servers located in a secure server room, from a remote location
