REPORT-IT ENTERPRISE

Live Broadcasts from your Smartphone

Turn your Smartphone into a 15kHz Live IP Audio Codec and ultra-slim 20kHz recorder for newsgathering

Introducing Report-IT

Reporters and remotely located talent can use Report-IT to broadcast live, 15kHz low-delay IP audio from any remote location over 3G, 4G or Wi-Fi to a Tieline IP-enabled codec in the studio, or use file servers to send prerecorded reports at up to 20kHz audio quality.

What can Report-IT Do?

Forget cumbersome, complicated and expensive field recorders - with the award winning Report-IT:

- Broadcast 15kHz live two-way interviews with the studio at the touch of a single button
- Use the high quality mic on the phone to prerecord interviews and then share these 20kHz WAV or AAC-LC (Apple) audio files with the studio via file transfer without a codec
- Prerecord interviews, trim them offline, build a user friendly playlist of edited clips and insert them into your live cross with the studio later (sometimes called wraparounds)

Anyone with a Smartphone can go live!

Remote talent can download the Report-IT Enterprise app for free, enter a username and password set by an engineer at the studio, hit 'connect' and be interviewed live by the studio in seconds!

What if a live or pre-recorded interview

has network dropouts? No problem - configure Report-IT to record the talent's audio onto the smartphone while you are interviewing them. After the interview the talent can transfer the pristine 20kHz recording to the studio at the touch of a button for editing or repackaging.

Other Application Features

- One-touch connections
- Go live, record a report, or report live and record simultaneously
- Stream recordings live to a Tieline studio codec using low delay, high quality Tieline Music or Opus encoding
- Edit recorded audio seamlessly via the TwistedWave or Nétia iSnippit audio editing apps for Apple (Additional Purchase)
- Edit recorded audio with any audio editing app for Android
- View connection statistics and renegotiate connection bit-rates
- Save, playback and edit recordings
- Configure via the separate Apple or Android TieServer Console App or optional PC/Mac TieServer Console
- FTP with Burli and Nétia Radio-Assist Integration

How to use Report-IT Enterprise

Use Report-IT Enterprise to centrally manage multiple users from the studio.

- Go to www.tieline.com/register to register
- Administrators download the TieServer Console app and use the administrator login to create unique password and connection settings for each user
- Users download the Report-IT Enterprise app for FREE
- Users log into the app securely with the account created by the administrator. Click 'Connect' and go live!

Tieline®
The Codec Company

Report-IT Live (Apple)	Report-IT Enterprise (Apple and Android)
• For freelancers and Independent journalists • All settings managed within the app on the phone itself • Basic app provides 2 hours of 'live-time' • In-app upgrade to Pro version for unlimited 'live-time' and other features • No annual subscription fee • Purchase Report-IT Live from the App Store	• Cloud-based solution with an emphasis on simplicity • Reporters and contributors install the free app from the App Store or Google Play; enter a username and password and go live in seconds! (requires annual subscription; See How to Buy Report-IT Enterprise) • Scalable to suit the specific needs of small, medium or large organisations • Manage all users in the cloud from anywhere using the Free TieServer Console app (Apple or Android versions), or optional PC/Mac TieServer Console web-browser GUI for an additional low annual subscription fee • Powered by Tieline's globally redundant TieServer network

It's that easy! Users require no technical knowledge and all settings for connecting to specific Tieline studio codecs or share servers download automatically and securely behind the scenes.

Alternatively, freelancers and independent journalists can use Report-IT Live to autonomously configure all connection settings within the app on any compatible iPhone, iPad or iPod touch.

How to Buy Report-IT Enterprise

Report-IT Enterprise requires a subscription to access Tieline's TieServer. For pricing and details on how to purchase a subscription contact Tieline at sales@ tieline.com or your favorite dealer.

Pricing structure:

- One-time establishment fee which includes the first year's subscription for 10 users, without device restrictions (subject to fair usage policy)
- Purchase additional user subscriptions in blocks of 10 to suit requirements
- Low annual subscription for 2nd year onwards
- Optional PC/Mac TieServer Console browser-based configuration available for a low annual subscription
