

JS-KD55

Kick Drum/Guitar Amp Mic Stand

Low-profile Mic Stand for Tight Spaces

The JS-KD55 is a low-profile mic stand that fits just about anywhere your kick drum or guitar amp might end up. At 15.5" to 21", it's plenty short enough to blend in on stage or in your studio. Plus, the v-shaped base means you can even set it around corners or close to other stands and equipment without the base getting in the way.

Adjustable for Precise Positioning

Not only is the JS-KD55 height adjustable, but it's also angle and depth adjustable as well! The stand is angle adjustable at the base and it includes a 16.5" fixed boom arm for even greater flexibility. You can get your microphone exactly where you want it to be with the JS-KD55!

Multi-purpose Use

You'll find many uses for the heavy-duty JS-KD55. Of course you can use it to mic up your kick drum or guitar amp, but it's also a great desktop solution as well! Whether you need sound reinforcement for a press conference, want to record your next podcast, or are mic'ing up the band, this mic stand offers the flexibility your next project demands.

Fixed boom arm provides even greater flexibility.

Angle-adjustable for precise positioning.

Heavy-duty die-cast base.
