PB SERIES PASSIVE PRESS BOXES Owner's Manual

The PB Series expands mic outputs when used with line outs on PRESSPOWER2 or PRESSMITE active press boxes or any time a line level feed is available.

These passive units distribute one line level input to multiple mic level outputs. Each output is transformer isolated, provides excellent interchannel isolation and is ground lifted to help eliminate noise problems. Whirlwind TRSP-2 transformers are used throughout.

The boxes are constructed with rugged, cold-rolled steel. Available with 6, 12, or 24 outputs.

Input Impedance: 2k Ohms
Output Impedance: 150 Ohms
Operating Level: 0dB input = -43dB output
Channel-to-channel Isolation: 65dB
