

AM-14T PREMIUM DUAL EAR HEADWORN

Features:

- Premium audio quality
- Rugged, lightweight will hold it's shape and protect your investment
- Behind the head design provides the highest level of stability
- Comfortable, even with glasses
- Includes windscreen and clothing clip
- Integrated drip-ring protects the mic element
- Moldable gooseneck boom allows for perfect placement

Tips:

Aim the mic element toward the corner of the mouth (see picture to the right), but never in front of the mouth.

Never wrap the mic and cable around the bodypack when finished - this will strain the wiring and the connectors on both the mic and your bodypack. Instead, loop the cable loosely.

The omnidirectional element provides excellent pickup and natural audio quality. Like any mic, be careful if using audio monitors or speakers to prevent feedback.

The mic may be used without the windscreen if desired. The windscreen is recommended if speaking outdoors.

Additional windscreens may be purchased through your dealer or at ansraudio.com.

Specifications:

Part Number: **AM-14T**

Frequency Response: 50 Hz - 18 kHz

Element: Electret condenser,
Omnidirectional

Dynamic Range: 93dB

Maximum Input SPL: 125 dB

Signal to Noise: 65dB @ 94 dB SPL

Bias: 1.5V to 9.0V

Sensitivity: 3-wire: -43dB re 1V / Pascal (7mV/Pa)
