

Guest Module 1

Remote Keypad

User Guide

JK Audio

Description

Guest Module 1 gives you remote access to the on-hook / off-hook and dial features of the Inn-keeper 1, 1r, 1x,1rx or Broadcast Host digital hybrids.

DTMF keypad

Keypad disable switch

Talk / Dial Button

Hang up Button

Ring / Call LED

Connection

Connect Guest Module 1 to your JK Audio digital hybrid using an 8 pin RJ45 modular cable. This cable provides remote power so there is no need for batteries or an external power pack. We have provided a 25 foot cable to cover most installations. If you need a custom length cable, be sure to purchase a cable wired so that the wire on pin 1 of each connector is the same color (pin 1 = pin 1). Data cables are usually wired pin 1 to pin 1, but telephone cables are usually wired pin 1 to pin 8.

Operating

The Call button will flicker when a call comes in. Press this button to answer or place a call. The button will stay lit when a call is present. When you dial on-air, the tones go out on the line, and do not come back mixed with the dial tone or caller signal. Guest Module 1 was designed exclusively for JK Audio Digital Hybrids.

RJ-45 Modular Pinout:

<u>Pin</u>	<u>Description</u>
1)	Ground
2)	Call / Drop Control
3)	Ring / OH LED
4)	DTMF Output
