TPR-110CR Presenter Transmitter Quick Start Guide

Thank you for purchasing the Luxi Electronics® TPR-110CR Presenter® transmitter. Please read through this manual before using the product.
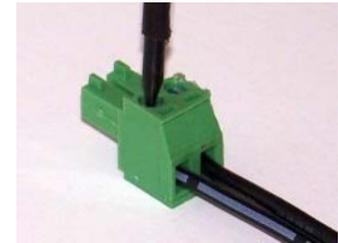

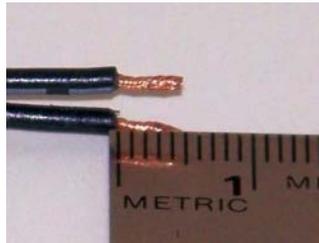

How the product functions: Think of the daisy chain as the flow of a river; each transmitter (Tx) connects to a source device and loads the signal to the river flow; each receiver (Rx) unloads the signal from the river flow and sends it to the display it is connected to. The front panel and the RS-232 controls determine which source signal goes to which display.

System diagram:

Power options: This product can draw power from other Presenter products in the chain or from an optional external power supply.

Captive screw plug termination: The captive screw plugs for power, RS-232 and contact controls are supplied with the unit. Separate the wires about 1" (2.5 cm) long; strip off the wire insulation precisely 3/16" (5 mm) from the end. Identify the positive and negative leads for power; Luxi power supply has a white stripe on the positive wire. If not sure, use a multi meter to verify.
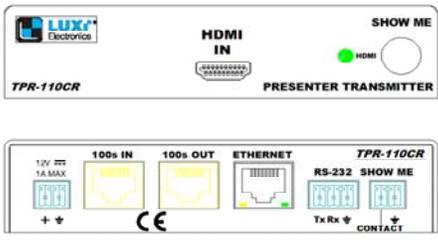

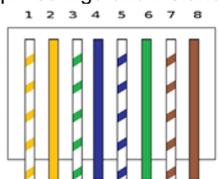

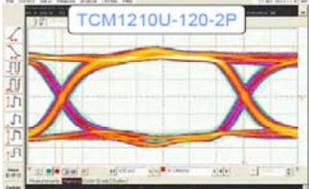

RJ45 plug termination: Follow the standard EIA 568B pin out.

Control options: Pressing the "Show Me" button on the front panel will select the source connected to this Tx unit; all displays will show the same content from this Tx box. An external button can be connected to the "Show Me" port on the rear panel. A RS-232 host connected to the rear panel can control all functions of every unit in the chain. Make sure both DIP switches recessed on the bottom side are in the down (off) position.

Ethernet port: For providing a system wide internet access. Be very careful NOT to plug the Ethernet cable into the yellow 100s connector or vice versa! Permanent damage may occur.

Front panel LED: Green = this Tx selected; Amber = this Tx not selected; Red = communication error

Support: Please contact your reseller directly for local support; or Luxi using the contact info above. See Luxi website for RS-232 commands and user manuals.

Features and Benefits	Mechanical

Features and Benefits

> Patent pending, revolutionary products to replace the centralized switching and distribution
> Completely scalable; you can add more Tx or Rx boxes on the fly for expansion
> Only 1 Cat6 or Cat5 cable needed to connect the adjacent Presenter Tx or Rx; no more heavy clusters of cables; very easy cable pull and termination
> No compression; full 18 Gbps bandwidth; virtually no propagation delays
> "Show Me" control button on every Tx box gives every user a simplified way to control the signal routing
> Additional control devices can be inserted anywhere in the daisy chain via RS-232
> Signals can be transmitted to very long distances with multiple daisy-chained devices up to 110' (33 m) each span (e.g., 10 spans for up to 330 m)
> Remote power capability
> Rack mountable, under-table mountable, above-projector mountable metal enclosures
