SPECIAL INSTRUCTIONS

- For safety's sake, be sure to adjust V-Stand® Pro height ONLY when keyboard is not on stand.

- Make sure height settings match on both inner struts before placing keyboard on V-Stand® Pro!

- Use pins to look stand arms and legs inplace. This makes it easy to move the stand around.

- The V-Stand Pro has a second tier available for purchase.

SETUP

Step 1
Lay stand on floor in folded position.

Step 2

Separate both legs outward until they stop.

Step 3

Secure both legs in an open position with locking pins.
Step 4

Pull vertical struts upward to a vertical position and spread them to their open position.

Step 5

Move support arms into their horizontal position by swinging them up and over the vertical struts.

Step 6

Secure both arms in a horizontal position with locking pins.

HEIGHT ADJUSTMENT

Step 1

Pull, or rotate, locking pin collar out to release inner strut.

Step 2

Raise or lower inner strut to desired height and push, or rotate, locking pin collar into locking position.

# REDUCING THE WIDTH OF THE COLUMN STRUTS

Step 1

Loosen and remove the screw and angle adapter from vertical struts.

Step 2

Flip and turn the angle adapter. Screw angle adapter back into the vertical struts.

Step 3

Repeat steps 1 and 2 to the other side.
