Lighting Restraint Cables

Safety Data Report

Fehr Bros. Industries Lighting Restraint Cables are made completely under our supervision.

Because the Snap Hook is a non-rated part without a lock and is not made to any military specification, each end user must determine their own "Safe Working Load", based on a safety ratio that takes into concerns such issues as shock loads, abrasion, corrosion, facility for regular inspections, and the danger to life and property should the hook fail*.

Fehr Bros. Industries has these parts tested regularly in an Independent Lab Testing Facility, and the following results are a typical mix of break results achieved:

	<u>39312-30 Galvanized</u>	<u>39312-30B Black Coated</u>
Sample #1	1,883 lbs.	1,595 lbs.
Sample #2	1,929 lbs.	2,125 lbs.
Sample #3	1,961 lbs.	1,732 lbs.
Sample #4	1,903 lbs.	1,980 lbs.
Sample #5	1,591 lbs.	1,888 lbs.
