

Matrix Multi-Viewer Presentation Switch

AC-MXMV122-UHD

THE IDEAL SOLUTION

A must have for any classroom, boardroom, game room, or any other situation where you need an array of sources coming together on one or two displays. In Multiview mode you can have four sources on the display at the same time, in any configuration you can think of. The Presentation Switch also handles the changing of inputs completely seamlessly giving you zero delay. Use that new 4K display with the 4K Quadview mode splitting your screen into 4 equal sections with one input displayed in each section. Let us help you make a diverse, useful setup for your client.

Configuration 5	2K Quad Split	Single Switched Source
Configuration 6	Single Switched Source	4K Quad Split
Configuration 7	Single Switched Source	Single Switched Source
Configuration 8	Multi-View (Custom)	Multi-View (Custom)

Diversity | Adaptability

-Instant seamless switching eliminates confusion when switching sources so your customer can offer smooth professional presentations.

-Limitless configurations allows maximum flexibility so information can be conveyed any way you like making your project truly CUSTOM.

-Multiple input formats ensures compatibility with any source so once this goes in it is a true single box solution, no need for converters...ever.

-4K Quad View offers pixel to pixel accuracy on 4K displays providing an ultra crisp multi-view so the information can be viewed on very large screens and at close distances, making your project stand out.

-Matrix Switching so you can show a multi-view on one screen and a full screen on another for robust multiscreen presentations allows you even more unique options, especially in larger rooms

-Custom presets lets you pre-configure "states" so your customer can access desired configurations instantly at the push of a button, minimizing after install support and making happy customers.
