Applications

Atlas Sound microphone floor stand Models MS-10C/MS-10CE and MS-12C/MS-12CE are the industry standard for application in schools, churches, recreation complexes, lounges, restaurants, conference areas, meeting rooms or wherever sound reinforcement or communications systems are applied. High-quality materials are combined to make these functional, full-height stands extremely stable and durable-serving as exceptional values for performers and presenters.

General Description

These all-purpose chrome and ebony finished stands, respectively, are quality, long-lasting models which feature durable tubing, the famous Atlas Sound wearproof clutch, and either a 10" or 12" diameter die cast circular base. The three-piece clutch provides positive locking control and is able to withstand years of stage and studio handling. The base features edge-concentrated weight distribution and is equipped with rubber pads to absorb shock and protect floor surfaces.

The $\frac{5}{8}$ " and $\frac{7}{8}$ " diameter tubing is fully adjustable. Tubing is manufactured of cold rolled steel and terminates in the industry standard $\frac{5}{8}$ " - 27 thread suitable for microphone clamps and accessories (see reverse side). Top and bottom lock-nut rings are included for versatile and secure positioning.

Models MS-10C/MS-12C are finished in chrome; Models MS-10CE/MS-12CE are finished in ebony epoxy to eliminate reflections caused by high-intensity lighting. This durable epoxy finish will withstand the rigors of repeated use and frequent transportation.
