

# Clear, Safe & Secure

ATCS-60 IR Discussion System

With Audio-Technica's ATCS-60 infrared discussion system, your wireless signal won't make it out of the room, let alone visit another building. While typical RF systems broadcast right through walls, the ATCS-60 keeps your signals clear, safe & secure, with no information leakage. The innovative ATCS-60 offers more flexible configuration, intuitive operation, and selectable channels for multi-language groups. Whatever your installations demand, listen for more.

*always listening*

## Easy to modify

Microphone and camera settings can be controlled by a PC running the "Conference Manager" software. The upgradable structure of the system makes it easier to adapt your conference setup.

## Unit selection function

By utilizing ID switch methodology, the ATCS-60 guarantees prompt and responsive unit selection.

## All finish function

The chairperson's unit has control to override all other units with the "all finish" function.

## Battery life indication

When battery life is low, both the power LED and microphone LED will flash rapidly as a warning.

## Listening options

Built-in speaker and headphone jack with personal volume control.

## Voice detection

The user can select automatic or manual mode. In the automatic mode, the microphone is turned on when spoken into and turned off when there is no voice. In manual mode, the simple operation of pressing the TALK (speech) button enables the on/off switching.

## Simultaneous interpretation

Up to 4 separate channels for multi-language meetings, making it possible to have one primary language and three additional translations.

## Flexible voting options

As many as 188 voters can be handled by an ATCS-60 system using ATCS-V60 modules.
