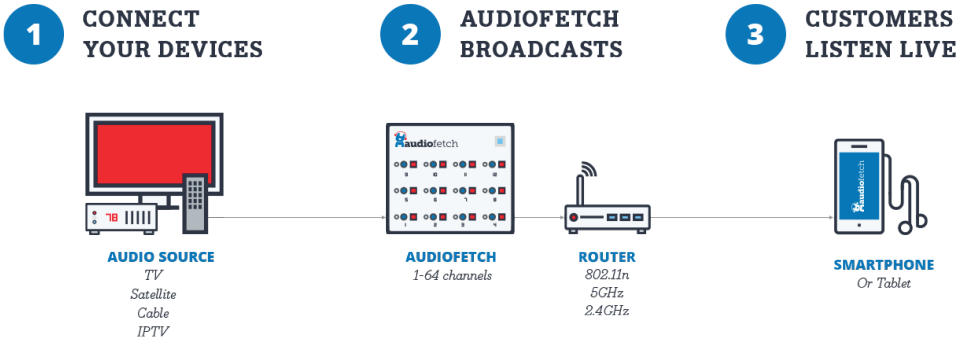
HOW IT WORKS

ONE PLATFORM, SO MANY POSSIBILITIES

AudioFetch is the absolute best platform for providing local audio to smartphones and tablets across any application. The Fetch-family of products are employed in fitness, sports bars, restaurants, airports, digital signage, assistive listening, casinos & gaming, education, and more.

From the tiny, single input AudioFetch Express with integrated WiFi to a full 64-input AudioFetch deployment, each audio input gets dedicated processor power to ensure your application scales now, and for the future.



THE LEADING TECHNOLOGY IN A SIMPLE - EASY TO USE DESIGN

We designed the AudioFetch app with simplicity in mind so it's user friendly with all age groups. Once you connect to the network, simply open the app and the app will immediately locate our unit and connect. No additional steps necessary.

- The settings menu gives you another way to close the app, access to settings and also includes back, help, feedback and about us.
- With a simple swipe of a finger or thumb, quickly and easily change the audio channel.
- Adjust the volume with the phones volume adjustment or adjust it using the touch screen on the phone.
- Post your logo or any advertisement in the form of a JPG or text. When a user clicks on this section, you can direct them directly to a site of your choice, inform them to call a number or send an email.
