

VSM

VIA Site Management

VIA Site Management (VSM) is a software application that allows an administrator to manage, monitor and make changes to all connected VIA GO, VIA Collage, VIA Connect PRO or VIA Campus gateways

FEATURES

VIA Gateway Management - Adds, removes, renames and groups gateways

Gateway Configuration - Sets default settings and features to all VIA gateways

Status Update - Identifies ON/OFF status of VIA gateways and firmware version running

Health Checking - Monitors the CPU usage and HDD level of each gateway

Push Updating - Pushes new firmware updates to the configured gateways

Free Demo - VSM is free for demo purposes (up to 3 devices to manage)

CONFIGURATIONS

VSM-UNLTD	VIA Site Management License - unlimited VIA gateways
