

6big Thunderbolt™ 3

6-Bay Desktop RAID Storage
Data Sheet

Think Big—We've Got You Covered.

With up to 60TB of capacity on your desktop, up to 1400MB/s speeds, and RAID 5/6, the LaCie 6big Thunderbolt 3 lets you rein in the stampede of data from 4K cameras.

The very fastest I/O.

LaCie harnessed the breakthrough performance potential of the Thunderbolt 3 I/O and squeezed out speeds of up to 1400MB/s—and 1200MB/s in RAID 5—to help slash time off nearly every task in your post-production workflow. Capture RAW footage from a RED® cinema camera or a shuttle drive (such as the LaCie Rugged™ RAID), edit multiple streams of ProRes 422 (HQ) or ProRes 4444 XQ, and fly through thumbnail and preview rendering on your biggest projects.

For your smartest workspace.

With double the video bandwidth of its predecessor, Thunderbolt 3 lets you daisy chain dual 4K displays or a single 5K display to the LaCie 6big. It's even possible to power a compatible laptop through the Thunderbolt 3 connection.¹

Big in every way. Except in footprint.

Get up to 60TB (54TB in RAID 5) on your desktop—in the same footprint as an iPad Air®. Invest up front in a future-proof, RAID-protected solution to improve data access and security, which can help you save money in the long term.

¹ Delivers up to 15W to power compatible laptops.
