

8big Rack

THUNDERBOLT™ 2

8-Bay Rack RAID Storage

Data Sheet

Fastest 1U Storage for 4K workflows

- Up to 1330MB/s¹ speeds for 4K video editing
- 8 bays in a 1U rack for superb storage density
- Dual Thunderbolt 2 ports for storage expansion
- Hardware RAID, optional enterprise-class drives and full component redundancy

design by neil poulton

Product Overview

The LaCie 8big Rack aggressively challenges Fibre Channel DAS for professional 4K video workflows. It offers better speeds and significantly simpler connections, with none of the complexities associated with an expensive Fibre Channel setup. The LaCie 8big Rack additionally offers a jaw-dropping 64TB in a 1U rackmount size, saving valuable space in server cabinets. It also offers hardware RAID 5/6, optional enterprise-class hard drives, expansion potential for a single Mac Pro® up to 1.7PB, and breakthroughs in serviceability.

Use Cases

- **Post-Production Pros:** Thunderbolt 2 bandwidth lets pros work directly from RAW 4K files in Apple® Final Cut Pro® or Adobe® Premiere®, getting full quality from footage and seeing edits in real time. Hardware RAID 5/6 and astonishing scalability makes this product the perfect complement to a new Mac Pro® for serious 4K video workflows.
- **Photography Professional Agencies:** High transfer rates, fast seek time and scalability let professional photo agencies and other Apple Lightroom® or Apple Aperture® users browse archived libraries of thousands of RAW and edited images, with less lag time.
- **Audio Professional Studios:** High performance gives Avid® Pro Tools® and other software users the ability to work seamlessly with hundreds of audio channels, making audio mixing much smoother.

¹ These transfer rates were achieved using AJA System Test when connected to a Mac computer via the Thunderbolt 2 interface. Actual data rates may vary depending on operating environment and other factors, such as chosen interface, RAID mode, RAID configuration, and disk capacity.
